

Q-Gun™ Series

200, 300, 400 Amp MIG Guns

Issued Jan. 2013 • Index No. SPEC Q234-1.4

400 amp Q-Gun™ MIG Gun shown with curved handle, medium 45° rotating neck and standard trigger.

Industrial Workhorse 200, 300 and 400 amp Q-Gun™ MIG Guns are easy-to-use and designed for exceptional performance and comfort in the most demanding industrial environments.

Stay-Tite™ Technology

Long-lasting power cable compression fittings and necks with large tapered gun connections combine to form the foundation of Bernard Stay-Tite™ Technology. This technology ensures optimal conductivity to increase weld consistency and lessen heat output while improving product durability.

All Guns are Not Created Equal.

A MIG gun should be durable, easy-to-use and customized to your specific application. Our MIG guns put you in control: you choose the options you need and we'll build a gun to last.

Centerfire™ Contact Tips, Nozzles and Diffusers are easy-to-use and high performing - they provide better arc starts, less spatter and more consistent welds - and also last up to three times longer than competitive brands.

Necks available in fixed, rotatable and multiple length options for optimal weld accessibility and improved operator comfort. Rotatable necks changeover without tools.

Jump Liner allows quick neck change and replacement of only most commonly worn or clogged liner area, which reduces the amount of time a gun is offline and minimizes inventory.

Multiple handle and trigger options to increase operator comfort.

Power cable equipped with Stay-Tite™ Technology and internal gas hose that resists kinking, improves gas flow and feedability.

Back end with durable rigid strain relief and easily interchangeable direct plugs and trigger leads connect to wire feeders and machines from major manufacturers and allow simple maintenance.
